## **Important information about your prescription for asthma inhalers**

**If you're using your blue reliever inhaler more than three times a week**

**Or you're collecting more than 12 reliever prescriptions a year**

**Please make an appointment for an asthma review.**

To make the most of your review appointment bring with you:

- all your inhalers, spacers and any other medicines you're taking for your asthma
- a list of questions you'd like to ask
- your written asthma action plan - if you haven't got one ask your asthma nurse

We want to make sure that your treatment is right for you.
